 LOCK.R

WE ARE

LE THI YEN VI

CEO

Oversees the entire project, responsible for timeline, quality control, and final decision-making.

TRUONG NGUYEN THAI BINH

CIO

Contributes to solution design and user experience optimization.

NGUYEN QUOC BAO HUY

CTO

Responsible for User Experience (UX) design, workflow mapping, and system operational logic.

VO HUYNH TRA MI

CFO

Develops revenue models, cost structures, and financial performance analysis.

LE DUY KHANG

COO

Supports product development and proposes new features and technical enhancements.

NGUYEN NHAT MINH THU

CMO

Conducts customer interviews and analyzes market trends and consumer insights.

CORE CONCEPT

LOCK.R - THE SMART HUB FOR MODERN LIVING

The Mission: We provide a 24/7 smart locker ecosystem located directly in apartment lobbies and dormitories.

The 3-in-1 Solution:

- Laundry: Drop off and pick up laundry anytime.
- Parcels: Secure delivery point for all e-commerce orders.
- Storage: Short-term personal storage for residents.

Our Promise: No "revolution" - just solving 3 specific daily headaches with precision.

THE PROBLEM

LINK: [THE EVIDENCE](#)

PROBLEM 1

The Shipper's Dilemma:
Delivery attempts often fail
because residents aren't
home, leading to high return
rates.

PROBLEM 2

Laundry Fatigue: Residents
waste 2–3 hours/week
traveling to laundromats
and waiting for specific
store hours.

PROBLEM 3

Lobby Overload:
Receptionists and security
guards are overwhelmed
with "holding favors" for
residents.

LOCK.R

WHY NOW?

Behavioral Shift: Gen Z and Millennials prefer "Contactless Self-Service" - no need for human interaction.

Market Pressure: E-commerce is booming, but the "Last Mile" is stuck at the lobby desk.

Technology Maturity: IoT sensors, QR integration, and app development are now affordable enough to make the unit economics work.

Bottom Line: LOCK.R isn't a "new" idea, it's the right idea at the right price and right time.

WI TARGET CUSTOMER

Ideal Customer Profile (ICP): Busy residents in major cities living in high-rise apartments or dorms who shop online frequently.

Early Adopters: Power users of Shopee, Grab, and Tiki who require weekly laundry services.

Beachhead Strategy: Initial Launch: Target 1 major Dormitory or Apartment complex in District 9, HCMC.

AGES 18–35

DISTRICT 9, HCMC.

>300 RESIDENTS

DISTRICT 9, HCMC.

Idea: A changing station right in the lobby for: dropping off laundry - receiving goods - designing lockers

WI SOLUTION CONCEPT

The Magic Moment: Picking up fresh, clean laundry or a high-value parcel without having to talk to a single person.

REVENUE MODEL

Profitability Target: Aiming for 400k–500k VND/locker/month to exceed the break-even point of 257k VND.

Diverse Income Streams: Revenue from parcel drops (5k), overnight storage (+5k), and laundry services (12k–15k).

Subscription Plans: Monthly passes (50k–70k VND) for students and frequent shippers to ensure recurring cash flow.

High Turnover Strategy: Target 3 uses/day per locker to maximize the utility of the 24-compartment hub.

Optimized Margins: Achieving a net profit of ~11M VND/month per hub through high utilization and average ticket sizes of 8k–10k VND.

Cost-Effective Operations: Partnering with local laundromats (7-8kg loads) at a 12k VND wholesale rate to protect margins.

COMPETITIVE LANDSCAPE

3-in-1 Ecosystem Advantage

The Alternatives:

- Traditional Laundromats (Inconvenient hours).
- Lobby drop-offs (High risk of theft/mess).
- Basic lockers (Single-purpose only).

Our Positioning: While competitors focus on single segments, LOCK.R provides a Unified Ecosystem powered by AI to optimize locker turnover and user flow.

KEY ASSUMPTIONS & GLOBAL VALIDATION

DATA-DRIVEN CONFIDENCE

Market Validation: 98% user satisfaction rate in global smart locker studies due to security and convenience.

>15% of E-commerce orders in Vietnam are currently returned due to "failed contact"—a gap **LOCK.R** closes.

Security First: Smart lockers provide 24/7 security with unique PIN/QR codes, eliminating "lobby theft."

Proven Scale: China has already deployed 1 million+ smart lockers, handling 10% of all parcels. We are bringing that proven efficiency to Vietnam.
